Re: No Lead Compliance

To all customers,

The PeterPaul Electronics Company certifies that catalog products with stainless steel bodies meet California's no lead law AB1953.

The California no lead law AB1953 addresses the lead content used in manufacturing products and is defined as not more than a weighted average of .25% lead in system components.

If you have any questions or concerns about your product's compliance please contact PeterPaul Electronics Company at (860) 229-4884.

Sincerely yours,

Paul Molinari
Director of QA & Compliance
